“Cloud Computing Will Be As Influential As E-business (Gartner)”

We wish to thank...

CloudCamp is a non-profit entity that organizes events on Cloud Computing on a worldwide basis. The formula is so successful that 63 CloudCamps have been organized so far and the list grows every day.

Sponsors are an essential part of CloudCamp's

lifecycle, they provide viable locations, catering, infrastructure and communication. Many attend and speak, others just support us because of the visionary value of the event.

Whatever their motivation might be, we are grateful for their commitment!
